

# ECS Capture Solutions

Enterprise scanning solutions that reduce paper records and make researching a breeze

Image Solutions

Manage It. Measure It. Expect It.

Overwhelmed by the paper documents accumulating at your financial institution or organization? ECS Capture Solutions from ProfitStars now offers you the chance to transform your paper documents into convenient, easily accessible electronic images.

Our experienced ECS professionals electronically capture your documents on-site or at our Capture Center using state-of-the-art scanning technology, then permanently archive the files to your document imaging system. ECS Capture Solutions offers you the same enterprise conversion business expertise ProfitStars has used to seamlessly convert and maintain data from virtually every platform used in the financial industry.

Banks and credit unions, plus a wide variety of diverse organizations – from nonprofits to utilities to small businesses, sole proprietorships, and more – no longer have to worry about storing paper records. You are also free from having to purchase a high-end scanner to accurately capture and archive important data. Instead, we bring state-of-the-art scanning and document conversion technology to your front door.

ProfitStars' ECS Capture Solutions service provides:

◀ **Total Security**

The physical scanning is performed on-site at your location (or at our Capture Center) by experienced and bonded professionals you can trust. Scanned documents can be securely shredded or re-filed. With the proven access controls established by your document imaging platform being enforced, you also eliminate unauthorized access to confidential information.

◀ **Enterprise-Wide Support**

Scanned documents can include loan back files, accounts receivable invoices, accounts payable documents, human resource and employee documents, customer information and billing records, or virtually any other department or enterprise-wide documents.

◀ **Maximum Flexibility**

Scanned documents can be archived in ProfitStars' Synergy™ Enterprise Content Management platform or other third-party document imaging or accounting solutions.

◀ **Measurable Cost Savings**

Eliminate the ever-increasing storage requirements for paper files, reclaim floor and storage space, and leverage the investment in your document scanning solution.

◀ **Staff Efficiency Improvements**

Replace manual, time-consuming searches of physical files with the immediate point-and-click retrieval of imaged documents.

◀ **Compliance**

Your compliance-driven document retention policies can be automatically applied to scanned documents enterprise-wide.

◀ **Reliability**

Production-proven scanning staff and technology are used to perform each engagement.

◀ **Peace of Mind**

This beneficial service is performed for you by an industry leading technology partner – with a proven background in the document and data conversion business.

This capture service is the latest addition to our Enterprise Conversion Solutions (ECS), which have already been used by approximately 600 financial institutions to convert images and data from antiquated check imaging, document imaging, COLD, and signature card solutions to state-of-the-art, more cost-effective platforms.

ECS Capture Solutions is another innovative imaging service from ProfitStars that eliminates backlogs of paper records, generates material operating efficiencies, reduces costs and storage space needs, expedites research, and streamlines information access and distribution.

## What It Does

- ◀ Transforms paper documents into convenient electronic images.
- ◀ Eliminates the increasing storage requirements and costs of paper files.
- ◀ Captures files and records without requiring the purchase of high-end, expensive scanners.
- ◀ Archives scanned files to any Enterprise Content Management platform.
- ◀ Also allows you compatibility with other third-party document imaging and accounting systems.
- ◀ Brings state-of-the-art technology to your door.

## What It Does For Me

- ◀ Enables your business to electronically store loan files, accounts receivable invoices, accounts payable documents, human resource and employee documents, customer information and billing records – or virtually any other department or enterprise-wide documents.
- ◀ Allows you to choose between re-filing or shredding documents after they are scanned and archived.
- ◀ Replaces manual, time-consuming searches through physical files with quick access to imaged documents.
- ◀ Eliminates unauthorized access to confidential information.
- ◀ Enables your organization to reclaim floor and storage space for other business purposes.
